

Here is the latest Triad Flora report. To contribute, send Lisa (lisal Gould@gmail.com) your observations, including common name, scientific name (if possible), place observed (locale, town, county), date observed, stage (e.g., in bloom, in fruit, leaves only, etc.), and observer's name. Please report only for the following counties:

Alamance, Caswell, Davidson, Davie, Forsyth, Guilford, Montgomery, Randolph, Rockingham, Stokes, Surry, and Yadkin.

Please include only plants that are in the wild (native or naturalized)—no garden plants; species with an asterisk (*) are not native to our area but have naturalized here.

Nomenclature is from *Flora of the Southern and Mid-Atlantic States*, Working Draft of 15 May 2011, by Alan S. Weakley, UNC Herbarium, Chapel Hill NC. Available as a free download (pdf) from: <http://www.herbarium.unc.edu/flora.htm>

The attached photo of Hollow-stem Joe-pye-weed with lots of swallowtail butterflies was taken by Phil Dickinson.

Sadly, this will be the last report with observations from Lloyd Ramsey, who died on Pilot Mountain July 30. He'll be missed by many people.
